Notes:

This ARK series PC-DVR is our number one seller. This ARK Series offers a high level of functionality with easy remote view software supported by Window's XP and Vista. DVR also boasts a free Point of Sale integration without the use of capture boxes or converters. Simple plug data into PC's serial port and configure your settings. Expect simple PTZ control with intuitive net viewer software that easily expands to incorporate up to 250 cameras simultaneously with full remote administrative control of DVR from any PC on the LAN or WAN. ARK is another strong, robust, user friendly surveillance solution from Adirondack.
