Notes:

The DGA series of embedded DVR's has user friendly GUI that supports mouse integration as well as a host of other features not commonly found in a unit of this price point. Internet Explorer allows live and playback images. You will also find multiple levels of user authorization with only one Administrative log in for added security while allowing low level access to live camera viewing. DGA Series also supports 3GPP viewing for integration with most smart phone applications, as well as I PAD and I PHONE. HDMI Monitor output and supports up to 20 channels of video (16 analog and 4 IP). For complete integration this DVR line will marry up with a CMS that supports all three of our embedded DVR lines.
