Notes:

DGA Series DVR is a complete solution for installations that require high frame rates with Hybrid technology. This DVR line will accept multiple IP cameras in place of analog inputs for a complete marriage of IP and analog in an affordable package. This DVR can be married with the DGS series as well as the D-NVR series PC-DVR. Stack DVR's for large commercial installs and enjoy the flexibility to use current analog while being able to utilize IP for wireless or network growth of system.
